

# **234** - 4SW-HT

Thermoplastic multispiral hose for UHP hydraulic, oil and gas applications in High Temperature Environments +130 °C (+266 °F) and working pressure to 1100 bar (15900 psi)

# FEATURES

Inner Tube Polyvinylidene fluoride (PVDF)

#### Reinforcement

Four spiral layers of steel wire

## Cover

Polyvinylidene fluoride (PVDF), black ink-jet branding

#### Industrial Applications

Oil and Gas applications // Methanol service // Chemical injection // Control of subsea components // Nitrogen service // Subsea well control // Gaseous media handling.

# Hydraulic Applications

Hydraulic jacks // Bolt tensioning // Testing applications // General UHP hydraulic applications

# **Temperature Range**

-20°C to 130°C (-4°F to 266°F)

## Features

Ultra high working pressure // Resistant to higher temperature // Low permeation to methanol and gaseous media // Superior chemical resistance of inner tube // Resistance to ozone, ultraviolet light and aging // High resistance against abrasion // Low volumetric expansion at maximum working pressure // Resistant to sea water // High impulse resistance // Long length capability // Excellent cut and crush resistance

#### Description

Ultra High Pressure hose utilising high tensile steel wire applied in counter rotating multiple spiral layers. Tube material resistant to high temperature and aggressive chemicals. It provides a good barrier to permeation of gaseous media. Tube and cover of engineering polymer with intermediate adhesion layers. Available also as factory made assemblies: please contact our sales office for further details.
